LANCASTER, Texas. (July 10, 2009) – The Emmy-award winning hit ABC television show, “Extreme Makeover: Home Edition,” is using Huber Engineered Woods LLC’s ZIP System® roof and wall sheathing and AdvanTech® flooring to construct a home for a deserving family in Lancaster, Texas as part of season seven, themed “Get on the Bus.” The ZIP System roof and wall sheathing and AdvanTech flooring feature superior moisture resistance and quick installation properties that will help Cheldan Homes successfully complete the home in just one week.

The lucky area family was recently surprised by a visit from Ty Pennington, team leader for the show when the family’s identity was made public. Construction on the home is underway and will conclude with the show’s “reveal” on Thursday, July 16 when Pennington recites the show’s signature phrase, “Move that bus!” ZIP System roof and wall sheathing and AdvanTech flooring will be installed on July 12.

After being used on several episodes last season, Huber Engineered Woods will join “Extreme Makeover: Home Edition” to make ZIP System roof and wall sheathing and AdvanTech flooring its preferred structural products season seven.

ZIP System® Roof Sheathing

ZIP System® roof panels have a built-in moisture barrier and eliminate the need for felt paper and H-clips. A code-recognized structural panel and underlayment all-in-one, ZIP System roof panels prevent expensive rework due to torn felt, and shingles or tiles can be applied directly to the panels. Since the ZIP System is faster to install than traditional methods and provide an instant 120-day rough dry-in, builders can schedule subcontractors sooner, ultimately completing the house in less time.

ZIP System® Wall Sheathing

The ZIP System® wall sheathing with a built-in water-resistive barrier is a structural wall panel, moisture barrier and air barrier all-in-one, providing a tight building envelope and superior moisture resistance during and after the construction. The Department of Energy recognizes that air barriers help prevent air leakage homes, which can account for 30 percent or more of a homes heating and cooling costs. ZIP System® tape is used on both the roof and wall products and provides moisture resistance for seams, valleys and ridges, can help reduce air leaks as recommended by the Seal and Insulate with the ENERGY STAR® effort, and is code recognized as window and door flashing tape when used with ZIP System Wall sheathing (ESR-2227). For more information, visit www.zipsystem.com.

AdvanTech Flooring

AdvanTech flooring has greater water resistance, design bending strength and stiffness than commodity oriented strand board (OSB) and plywood, providing superior quality and the best warranty in the business – a limited 50-year transferable warranty and a 300-day no-sanding guarantee. AdvanTech flooring has fastening guide marks and self-spacing tongue and groove for easy installation. For more information, visit www.advantechperforms.com.
